## Transform Shipping Cartons Into Eco-Friendly Packing Materials...

The **Greenwave 430 Cardboard Perforator** has the solution to help transition from single-use plastic and foam packing materials. Using **heavy-duty solid steel blades**, it transforms corrugated shipping cartons into high-quality eco-friendly perforated packing materials. This **freestanding unit** features heavy-duty casters for easy mobility and a **molded plastic waste bin**. Operation is easy: choose the finished size of the packing materials, adjust the cutting guide, press start, and insert cardboard. The result is **flexible, shock-absorbing netting** which is easy to wrap around objects to provide protective cushioning during shipment. It's **essentially producing free packaging material**, and can promote a sustainable image to customers. Standard features include an **all-metal housing, solid steel perforating blades, rugged metal gearing, and a bold-print measuring scale**.

### Trim to the Perfect Size

*Simply set the side guide to trim cardboard to the custom size of your product and shipping box*

### Simple Push-Button Control

*Start, stop, and reverse easily with a single toggle switch*

### Perforation Transformation

*Cardboard up to .4" thick is quickly transformed into valuable net-like cushioning packing material*

## The Environmentally Friendly Greenwave 430

**REDUCE:** Reduce or eliminate the need to purchase costly single-use plastic or foam packing materials, as well as reducing waste disposal costs.

**REUSE:** Reuse the cardboard packaging you already have.

**RECYCLE:** Use an existing product instead of buying new packing materials.
